

MOBILE INTEGRATED HEALTHCARE

Evolution Health's fully integrated medical practice specializes in providing the highest quality care in the home and non-traditional settings, whether it's for one patient or a population of thousands. With a focus on the high-risk, medically complex, chronically ill, frail elderly, mobility impaired and other vulnerable patients, Evolution Health reduces the cost of care to risk-bearing entities by understanding that population health requires both planned and unplanned care.

Evolution Health's comprehensive home healthcare team enables effective, efficient and personalized assessment of patients. Evolution Health's state-of-the-art Medical Command Center provides immediate access to licensed medical professionals capable of evaluating the patient's current condition, then matching and deploying appropriate resources to meet the patient's needs.

EVOLUTION HEALTH SERVICES

CASE STUDY:

Preventing Infection and Reducing Costs

SITUATION

Patient

- 69-year-old male, post-stroke, right-side paralysis requiring a feeding tube
- Evolution Health (EvH) patient receiving regular in-home speech therapy sessions

Condition

- During a therapy session, notice leakage and skin irritation around the tube

Call

- Patient's caregiver calls the EvH Medical Command Center

CARE PLAN

Initial Triage

- Phone evaluation between EvH Nurse Navigator and Mobile Integrated Nurse results in EvH Nurse Practitioner and AMR Mobile Integrated Paramedic dispatch to patient

Diagnosis

- Dysfunctional feeding tube
- Depleted medical supplies needed for proper wound treatment

Actionable Treatment

- The Care Team:
 - **Consults** with the patient's primary care physician as well as EvH on-call physician who recommend a procedure to replace the dysfunctional feeding tube
 - **Connects** the patient to the appropriate specialist physician and schedules the outpatient procedure
 - **Arranges** transport to and from the hospital by an AMR ambulance for outpatient procedure
 - **Orders** Medical supplies

OUTCOMES

Results

- Successful procedure
- Wound remained uninfected
- Replenished medical supplies

Cost & Time Savings

- Patient did not require emergency transport to hospital
- Patient avoided unnecessary emergency room visit
